

AGENDA
WATER RESOURCES ADVISORY COMMISSION
South Florida Water Management District
Issues Workshop: Minimum Flow and Level for Biscayne Bay
Seminar Room, Rosenthal School of Marine and Atmospheric Science
4600 Rickenbacker Causeway
Virginia Key, FL
August 25, 2004
8:30 a.m. - 12:00 p.m.

1. Introduction and Recap
8:30 a.m. - 8:45 a.m.
Dean Powell, Director,
Watershed Management
Dept., SFWMD
2. Follow-up issue: What is the baseline?
8:45 a.m. – 9:15 a.m.
Joel VanArman, Chief
Scientist, Planning and
Development Div., SFWMD
3. Follow-up Issues: Describe the process used to select indicator organisms and recommend shoal grass. How does shoal grass protect other species?
9:15 a.m. – 9:45 a.m.
Rick Alleman, Lead
Environmental Scientist,
Coastal Ecosystems Div.,
SFWMD
4. Follow-up Issues: How were fish evaluated and how do eastern and western shorelines compare? Where will significant harm will be determined spatially?
9:45 a.m. - 10:15 a.m.
Murray Miller, Sr.
Environmental Scientist,
Planning and Development
Div., SFWMD
5. Simulating salinity and flows: Strengths and weaknesses in data and models
10:30 a.m. - 11:30 a.m.
Rick Alleman, Lead
Environmental Scientist,
Coastal Ecosystems Div.,
SFWMD
6. Next steps and wrap-up
11:30 p.m. – 12:00 p.m.
John Mulliken, Deputy
Director, Water Supply Dept.,
SFWMD
